

Prevention and administration of social and environmental conflicts in Hydropower Development – Asia Regional

23–27 November 2020

ICH Conflict Management Series – Remote – MODULE I

The electricity industry faces a number of challenges, including balancing between achieving business objectives and sustaining meaningful relationships with impacted communities, state entities, and other stakeholders.

The conflict of interests among stakeholders may result in points of disagreement, resistance, or opposition. In some cases, conflicts can lead to violence and adversely affect not only the fulfilment of a company's goals, but also the renewable energy policies of a country.

ICH's Conflict management training series in Asia region joins forces with IFC Asia ESG Advisory for this virtual training delivery.

The objective of this course is to provide participants with fundamental knowledge of triggers of conflict and the impact of conflict on project devel-

opment. The course will include real world examples and examine underlying issues and lessons learned that can be applied in project planning.

The course will pivot towards Asia and will focus on resettlement as a central theme.

This course is a foundation course with in-person training expected to be delivered in South East Asia Region, in 2021.

COURSE TOPICS

- Origins of conflict in the renewable energy industry
- The need for meaningful public participation
- The unique risks linked to resettlement
- Indigenous People in Asia – current issues
- Conflict prevention
- Conflict analysis
- Project management in conflict
- Community health and conflict

The course is aimed at professionals with a minimum of five years of experience in the hydropower or renewable energy sector including power companies, ministries, authorities, NGOs, relevant private enterprises, and others working with energy project planning in complex social environments requiring knowledge of stakeholder management.

Executives of power companies, ministries, water resource and energy agencies, and relevant private sector enterprises with management responsibility or influence on project planning will also benefit from this course.

COURSE FEE IS 100 USD

Sponsor seats available for Norad focus countries in the region
